As Pınar Entegre Et ve Un San. A.Ş., we are committed to adhering to the following policies in the fields of ingredient supply, design, production, storage, shipment, and laboratory services for beef and turkey farming, red meat and poultry meat, meat products, aquatic products, plant-based and dairy-based products, and bakery products:

- As a subsidiary of Yaşar Holding, which has signed the Global Compact, valuing people and the environment, reducing greenhouse gas emissions resulting from our activities, using natural resources efficiently, and preventing environmental pollution,
- Supporting ethical behavior in our activities and acting with a sense of social responsibility to contribute to economic, social, and environmental sustainability
- Meeting the requirements of standards such as Quality, Food Safety, Occupational Health and Safety, Environment, Energy, Laboratory, Halal Food (OIC SMIIC, GSO 993 & GSO 2055-1) , and Good Agricultural Practices, analyzing and identifying the risks and opportunities related to our activities, managing our risks and opportunities with appropriate preventive measures, monitoring the performance of our processes against the targets we have set, and providing the necessary resources to continuously improve.
- Producing in compliance with legal requirements, customer demands, and Pınar Et specifications related to our fields of activity,
- Ensuring that all stakeholders in the value chain, including our employees, become aware of our Sustainability approach and policies, Integrated Management System, and policies through training and internal-external communication channels, and encouraging their participation in the development of the system,
- Managing our processes with approaches that embrace effective, efficient, innovative, and sustainable development, in order to offer our products at the most optimal value,
- Implementing practices to reduce food loss and waste while carrying out our activities,
- Ensuring customer satisfaction and meeting their requirements,
- Ensuring food safety, making our food safety and quality culture sustainable, and ensuring its adoption by all our employees,
- Controlling Occupational Health and Safety risks, providing safe and healthy working conditions to prevent work-related injuries and deterioration of employees' health,
- Analyzing energy consumption during our activities, controlling it through relevant monitoring and measurement systems, and developing projects aimed at energy efficiency. Additionally, researching alternative energy sources and carrying out efforts to improve energy performance.
- In our Laboratory, where we verify the compliance of our products and processes with food safety and quality requirements, we address analysis requests from internal and external customers with an independent, impartial approach that ensures confidentiality of information, in accordance with the TS EN ISO/IEC 17025 Standard, quickly, reliably, and accurately.
- Being a model organization in the industry by adhering to national and international animal welfare requirements while carrying out our activities.
